Appendix 2- Distribution List	

1. Introduction

The purpose of this document is to establish the result procedures of the sport, while setting the framework for the operational development of the sport during Games-time operations. In specific, this document:

- Creates an overall idea of the of what reports need to be produced by the GMS
- Achieves an overall idea and clear understanding of the GMS
- Identifies a list Reports
- Identifies key timelines of each report

2. List of Powerlifting Outputs

No.	Results/Report
1	(Rt.1) Entry List per Delegation-Event
2	(Rt.2) Competition Schedule
3	(Rt.3) Scheduling Report
4	(Rt.4) Athlete Equipment List
5	(Rt.5) Rack Height - Blocks
6	(Rt.6) People with Issues
7	(Rt.7) Start List without Weight
8	(Rt.8) Start List with Weight
9	(Rt.9) Scorecards
10	(Rt.10) Score sheet (Empty)
11	(Rt.11) Score sheet – Unofficial Results
12	(Rt.12) Final Results
13	(Rt.13) Awards Staging
14	(Rt.14) Awards Presentation Report

Refer to **Appendix 1** for Powerlifting Results / Reports Outputs

3. Procedures

2.1 Results Service and Competition Management Support

This part of the Procedures section focuses on processes related to the gathering, processing and distribution of information concerning competition progress and results and the acquisition and processing of data that the GOC Competition Management require in order to prepare for and manage competition.

Roles and of this document is to documented in chronological order the results processing during competition (Divisioning reports, start lists, results, Awards etc.).

2.2 Pre-Games Activities

Some competition-related information must be available on the first day of the Sports Information and Information Desks in the Special Olympic village is operational. When Teams arrive in the Special Olympic village, most teams and media require the latest release of the Games schedule, the competition format.

The final few weeks before the Games can be hectic and the wise organiser will prepare aspects of this information weeks in advance or as early as possible.

2.3 Schedules and competition format

Most of the Games participants will receive the Games schedule from different sources before they arrive in the host city. Schedules will be printed in a number of publications that the OC will send to SOI. Schedules will be available on the official WEB site.

Despite this, experience shows that high-demand items of information after teams' and journalists' arrival are the competition schedules. It is highly likely that participants will want to check for any last minute changes in the schedule. Additionally they will want to verify other information about the competition, such as competition phases.

All the above information should be prepared in outputs:

- Powerlifting Competition Schedule

It will be distributed on the first day of operations of each client.

Before distribution of the competition Schedule it will have to be approved by the Technical Delegate allocated by SOI.

Once the content of these outputs has been agreed between the Technical Delegate and the OC Competition Management, it will be distributed to all clients.

Should it become necessary to change data in the above-mentioned outputs after verification and distribution, the OC Competition Management will immediately send corrections by electronic means with the new date and version.

2.4 Pre-competition Activities

After the Technical Delegate arrives in the host city, they will work with the OC Competition Management on the final preparations for the Games. During the period before the start of Games, a

lot of time will be spent on final checking of the participant data and the preparation, checking and correction of other information if necessary.

It is important that the process for transferring this data from its official source to the Organizing Committee is agreed much earlier and that any planned technology solution is properly tested.

2.5 Pre-event Activities

2.5.1 Athlete assessment/ Equipment check – Head Coaches Meeting

One (1) day before the start of the competition, the Athlete assessment/ Equipment check will take place, at the competition venue. During this process, the athletes in cooperation with their coaches are going to declare the Rack Heights for the bench press and the squat, as well as if they need blocks, to support their feet during the bench press discipline. Following that, a thorough equipment check is going to be performed, in order to ensure the conformity of the athletes' equipment with the rules. The Technical Officials are going to lead this process, so the following reports should be ready 30 minutes before the process starts:

- Rack Heights – Blocks
- Athlete Equipment List

A Head Coaches Meeting will be organized right after the Athlete assessment/ Equipment check procedure.

Three (3) hours prior to the meeting the following information should be ready and available to all delegations upon arrival in the venue at the Sports INFO Desk.

- Entry List by Delegation
- Competition Schedule
- People with Issues

These should be printed by the Games Management System (GMS) Team and distributed by result runners

2.5.2 Divisioning

The divisioning process takes place during the Head Coaches Meeting.

Approximately 30 minutes after the Head Coaches Meeting is complete, the GMS Team will produce the outputs:

- Scheduling Report
- Start List without Weight

These reports will be distributed by result runners.

2.5.3 Before the match/game [Staging Area]

At the beginning of the day and 30 minutes before the weigh-in starts

- Start List without Weight

should be printed by the GMS Team and distributed to the Officials performing the weigh-in, in order for them to fill the reports with information,

and thirty (30) minutes before the Powerlifting competition begins

- Scorecards
- Start List with Weight

should be printed by the GMS Team and distributed to the relevant client groups according to the attached distribution list. Competition Management should produce and distribute to the scorekeeper Technical Official and the Jury the following report:

- Score sheet (Empty)

2.5.4 During the match

The competition progression will be displayed on a video wall next to the competition platform.

2.5.5 After the match / Game

After the game is completed, the Technical Delegate or an authorized by him person will sign off the score sheet and give it to the GMS team in order for them to produce the results of the competition

- Score sheet – Unofficial Results

will print out on a colored paper by the GMS Team the result/report will be posed up on the bulletin board for teams/athletes to see for 30 minutes which is the time frame that teams have to submit their protest.

If no protest has been submitted after 30 minutes the official result output:

- Final Results

will print out on a white paper by the GMS Team and will be distributed to all relevant client groups by result runners.

2.5.6 After the Competition

At the end of the competition at each division, the GMS Team should produce the outputs:

- Awards Staging
- **Awards Presentation Report**

and distributed to all relevant client groups by result runners.

2.6 Real time data presentation

The public scoreboard is one of the critical elements in the production of a Powerlifting competition. It, along with the action on the field of play is the centre of all attention for keeping spectators abreast of the competition.

Public scoreboard displays are essentially a result-oriented type of information. The public scoreboard in Powerlifting is used to present the progression of the competition and the results.

In addition, the public scoreboard and video board(s) if applicable can be used in an infinite number of ways to supplement the action and turn the competition into a live production rather than a sterile sequence of events. During warm-ups, for example, the scoreboard can be used to entertain the crowd with trivia, news, or last minute announcements. A brief history of an event has been successfully presented in the past just before the start of events and helps to build a sense of anticipation in the crowd.

It should be noted that the design and implementation of a good public scoreboard and video board production are very time consuming and difficult to manage. It is not the intention of this document to describe all that can be done in this area, but only to note that it can be done, and what information is mandatory or minimally required.

2.7 Exceptional situation handling

DNS = Did Not Start

In this case, an athlete has been weighed in and gone to the warm-up area, but for some reasons (injury, not willing to lift etc.) the athlete does not perform any lifts throughout the competition.

DNF = Did Not Finish

In this case, the athlete performs at least one lift, but for some reasons, (injury, not willing to lift etc.) the athlete is quitting the competition and not lifting anymore.

DSQ = Disqualified

In this case the athlete is disqualified from the competition for reasons that have to do with the behavior of the athlete and his conformity to the rules (i.e. dropping the weight intentionally)

The above initials will appear on the relevant reports if they occur.

4. Distribution Table

The table has been created to show all relevant outputs, Description / Delivery Time and all involved client groups. It identifies which result/report go to which client and the quantity of each delivery. It also shows the method of delivery and the location that it will be delivered.

Refer to **Appendix 2** for Distribution List
