

Throwing Skills

Dear Family,

Playing ball is a favorite pastime for many children, and it's a fabulous way to increase physical fitness. That's why I'm excited that our current Young Athletes focus is **throwing skills**. We're teaching children how to grip a ball and let go of it—key skills they'll use in sport and recreational activities when they are older. Being good at throwing helps children feel more comfortable joining in games with friends.

A great thing about this skill area is that it lends itself to **social interactions** and personal connections. Invite family members or children in the neighborhood to play catch. Older children or those with more advanced sport skills can be great models for your child. To ensure that your child achieves success throwing, try using different-size balls. If your child can easily lift a ball over his or her head with two hands, the ball is a good size. Foam balls are especially easy for young children to grip. You'll find that catching and throwing are such closely related skills, some games provide practice with both. Enjoy sharing in playtime at home and watching your child's skills grow!

Sincerely,

Teacher

Throwing involves strength, flexibility, balance and coordination.

Healthy Habits

Set the stage for nutritious food choices by talking about healthy foods during playtime. As you and your child toss a ball back and forth, name favorite healthy foods. Or tape pictures of fruit on the wall at various heights to serve as targets.

Apples

Oranges

Confidence Booster

As children gain motor skills through Young Athletes activities, they also progress in social and emotional learning. They become more confident and enthusiastic. They play better with others and learn skills that they will use in school.
