There are very mild side effects that go away quickly. They include headaches, chills, fatigue or muscle pain. These side effects last for a day or two. These side effects show your immune system is responding to the vaccine.

You can get the vaccine even if you have severe allergies. All people wait 15-30 minutes after getting the vaccine to observe for reactions. You can't get the vaccine if you have had a severe allergic reaction to the COVID-19 vaccine or the ingredients of the COVID-19 vaccine. These ingredients include polyethylene glycol or polysorbate.

The COVID-19 vaccine works by teaching your immune system how to fight the virus that causes COVID-19. This protects you from getting sick with COVID-19.

The COVID-19 vaccine cannot make you sick with COVID-19.

There is a chance you can get re-infected with COVID-19. Even if you already had a COVID-19 infection. After getting COVID-19, the body does get immune to it, but it is not clear how long that lasts. So, the vaccine is still needed.

It may take time for everyone who wants a COVID-19 vaccination to get one. You still need to do all the other things to prevent COVID-19 infection. Keep your mask on. Continue to stay distanced from people. Keep washing your hands.

There is no vaccine microchip. The vaccine will not track people or gather personal information.
