The Healthy Athlete Clinical Director: MedFest

Special Olympics is a global movement of people creating a new world of inclusion and community, where every single person is accepted and welcomed, regardless of ability or disability. We are helping to make the world a better, healthier and more joyful place -- one athlete, one volunteer, one family member at a time.

The Healthy Athletes program is dedicated to providing health services and education to Special Olympics athletes, and changing the way health systems interact with people with intellectual disabilities. Through free health screenings, training for healthcare professionals, and evaluation of the health status of people with intellectual disability, Healthy Athletes has become a powerful public health organization worldwide.

MedFest was created to offer the physical exam that all athletes need prior to participating in Special Olympics sports programming. Clinical Directors are an important part of the Healthy Athletes MedFest team. Clinical Directors are responsible for working with their local Special Olympics Program and other volunteer health professionals in coordinating a MedFest event in their region.

The role of a MedFest Clinical Director includes, but is not limited to:

1. Determining event opportunities
   Identifying and scheduling the best opportunity to provide MedFest screening is a joint effort between the Clinical Director and their local Special Olympics Program. Clinical Directors will also help determine how to design the events based on the primary purpose of the event – to provide medical exams to new athletes, existing athletes who are up for re-certification, or a combination which may impact the timing and location. Also Clinical Directors may help determine whether other screenings (e.g. dental, vision) will be included at the MedFest event.

2. Recruiting and Training Volunteer Health Professionals
   Clinical Directors are the best people to identify and train health volunteers to work in the specific areas that will be offered in the MedFest venue, because they know their community and its local health care professionals. Potential volunteers may come from:
   • Private Practitioners
   • Universities/Colleges/Schools
   • Health and Professional Associations
   • Medical Facilities
   • Government Medical Facilities (Military/VA/State/National/Local) and
   • State or Local Public Health Agencies
3. **Capacity Grant Application**
Clinical Directors will work with their local Program to assure that supplies and equipment needed to deliver the core components of MedFest are included in the Healthy Athletes' Capacity Grant application. These grants assist Programs in purchasing interactive educational materials, athlete giveaways and incentives, volunteer recognition, signage and other supplies/equipment needed to conduct an impactful MedFest program.

4. **Obtaining Equipment, Supplies and Athlete Giveaways**
Needed supplies, equipment and athlete giveaways may be available to Clinical Directors through donations or loans obtained by networking with local sponsors and health services. Special Olympics headquarters also receives donations of goods and equipment that can be made available for events, if local sources are not available.

5. **Setting Up and Supervising the Healthy Athletes Venue**
On the day of the event, the Clinical Director is responsible for supervising the set up and delivery of screening and interactive education services by trained volunteers.

6. **Collecting and Reporting Data**
Clinical Directors use the Medical Form (and Healthy Athletes Software (HAS)) to document screening data collected during the event. Data is used to determine need for health care provider referrals, and to assess the health status and needs of individual Special Olympics athletes. This data provides Healthy Athletes Programs worldwide with factual information to increase awareness and provide more services.

7. **Program Evaluation**
Evaluation gives Clinical Directors the opportunity to continuously improve and adapt their programs to the needs of the athletes.

**MedFest Clinical Director Background and Requirements:**

- Be a licensed physician, physician assistant, nurse practitioner;

- A minimum three-year commitment to serving as a Clinical Director to ensure quality and continuity of services; and

- Completion of the Online Train-the-Trainer Module, where information and training about Special Olympics, Healthy Athletes, and MedFest specific management and clinical requirements are provided.
  - Interested healthcare professionals must submit their resume/cv for consideration and approval prior to taking the online training module.
  - The Online Training is accredited through American Academy of Family Practitioners for 2.5 hours of prescribed credit.

If you are interested in serving as a Clinical Director, please contact your local Special Olympics Program -- [http://www.specialolympics.org/program_locator.aspx](http://www.specialolympics.org/program_locator.aspx)
