

### Vision Report Card

**Name:** \_\_\_\_\_

**Date:** \_\_\_\_\_

The Lions Clubs International Foundation Opening Eyes program provides non-dilated vision screenings, and fabrication of prescription eyewear to Special Olympics athletes. The testing performed was designed only to detect possible vision problems. The results of the testing do not reflect a complete exam of the health and function of the visual system. The Opening Eyes screening does **NOT** replace a comprehensive eye exam, which includes dilation. It is recommended that athletes receive a dilated comprehensive eye exam annually or as recommended for further evaluation.

Based on the screening:

\_\_\_\_\_ If noted below the athlete demonstrated difficulty in these areas. This does not mean that further eye or health care is not required.

	<b>Visual Acuity</b>	
	<b>Eye Health</b>	
	<b>Depth Perception</b>	
	<b>Other:</b>	

\_\_\_\_\_ A new pair of glasses is being provided to the athlete at no charge. The glasses may be delivered during the games or mailed to them following the completion of the event. Please allow at least 8-10 weeks following the event.

The glasses are to be used as follows:

	<b>Full time wear</b>		<b>Distance Vision (TV, movies)</b>
	<b>Sports Activities</b>		<b>Near Vision (reading, school, work)</b>

\_\_\_\_\_ the athlete has been referred for additional care to: \_\_\_\_\_.

Thank you for participating in the screening. If you have any questions, please call your Special Olympics State Program Health Manager for any additional information.
