Title	Inclusive Health Stakeholder Mapping Tool
Description	An adaptable tool designed to help Programs identify potential collaborators or partners to influence policy change or health system strengthening to be inclusive of people with IDD.
Objective	To equip Programs with a tool to map stakeholders and establish a baseline database of potential stakeholders
Key features/components	User-friendly, comprehensive and allows for creating a stakeholder profile.
Benefits	It will help Programs in identifying priority partners to start with based on the needs of their community and the Programs strategic priorities.

Title	Partnerships and Collaborations Spectrum for Health System Strengthening
Description	An interactive resource development exercise designed to help Programs assess and categorize their partnerships and collaborations by analysing the data submitted in the SHE - Collaborations List
Objective	The primary objective of this resource is to differentiate between collaboration and partnerships using existing data at SO Programs level.
Key features/components	It will allow for existing data integration and categorization of collaborations/partnerships . It will also allow for analysing outcomes of partnerships/collaborations.
Benefits	It will help defining the partnerships spectrum at SO. It will help Programs in identifying where the collaborations fall and in prioritization of workload. It will utilize the data submitted in the SHE for data-driven decision making .

Title	Partnerships and Collaborations for Health System Strengthening Database
Description	Based on the information and data generated from the SHE Collaborations List (as well as partnership spectrum and stakeholder mapping), a comprehensive database will be created to help SOI and regions analyse partnerships and collaborations and identify potential opportunities and optimize them.
Objective	To create a pilot database and have all collaboration/partnerships related information.
Key features/components	Partner profile, list of partners per region and country. Captures regional and global partners. Search and filter capabilities. User-friendly, centralized with access granted to concerned parties.
Benefits	Better follow up and tracking of partnerships, helps in reporting and planning. Generate stories or posts for the webpage. Metrics tracking.

Title	Roadmap Resource to Integrate SO IDD Inclusive Curriculum into Health Professions Education
Description	A Resource/tool designed to help Programs in the effort of identifying and promoting the adoption of SO IDD inclusive health curriculum by universities and accreditation bodies.
Objective	To increase the number of Programs promoting SO IH curriculum and to leverage existing efforts.
Key features/components	Roadmap document, dynamic and adaptable depending on the context and needs. Shares step by step information on promoting adoption, identifying universities or accreditation bodies, and good practices from Programs around the world.
Benefits	Time saving as the resource will include templates, forms, and email drafts.

Title	Community Health Workers Strategy: background and way forward to increasing uptake of SO ID training for CHWs
Description	A set of sessions to provide Programs with background on CHWs work in their region and to provide Programs with information on where to find/look for organizations that employ CHWs for their operations.
Objective	To provide Programs with needed skills and information to increase partnerships/collaborations with organizations that employ CHWs and therefore increase uptake of SO ID training for CHWs
Key features/components	Host a partner to explain more about CHW work and field of operations/duties. 1-pager on SO ID training for CHWs and an email template to be used by Programs.
Benefits	Increase uptake of the training, more CHWs will be trained on ID and strengthened collaborations.
