All supports, such as blocks or holes, which give a competitor an advantage at the start, are prohibited.

All competitors in each division shall start on the starting line side by side at the same time. There will be no timed interval starts.

Competitors may begin the race/leave the start area after the start signal.

6.6.1.3 The designated exchange zone is the 20 meter long space within the vertical planes extending up from two lines on the track 20 meters apart. The zones shall start and finish at the edges of the zone lines nearest the start line in the running direction.

6.6.1.4 A proper exchange of the baton must take place within the exchange zone between the incoming and outgoing runner.

Competitors awaiting the baton will be positioned by officials on the track prior to the start of the race (for the 4 X 100 Meter Relay) or, as the leading runner passes the 200 meter to go point (for the 4 x 400 Meter Relay) in the same order (inside to out) as the order of their respective incoming team member.

Competitors waiting for the baton can take an inner position on the track as incoming team members approach, provided they do not jostle or obstruct another competitor so as to impede the other competitor's progress.

Competitors in the 4 x 100 Meter Relay about to receive the baton may commence running not more than 10 meters before the exchange zone. A line shall be marked on the track to denote this extended limit. If a competitor does not follow this Rule, their team shall be disqualified.

6.6.1.5 If dropped, the baton shall be recovered by the competitor who dropped it. He/he may leave their lane to retrieve the baton provided that, by doing so, they do not lessen the distance to be covered. In addition, where the baton is dropped in such a way that it moves sideways or forward in the direction of running (including beyond the finish line), the competitor who dropped it, after retrieving it, must return at least to the point where it was last in his hand, before continuing in the race.

6.6.1.6 Provided these procedures are adopted where applicable and no other competitor is impeded, dropping the baton shall not result in disqualification. If a competitor does not follow this Rule, his/her team shall be disqualified.

6.6.1.7 The baton shall be passed within the exchange zone. The passing of the baton commences when it is first touched by the receiving competitor and is completed the moment it is in the hand of only the receiving competitor. In relation to the exchange zone, it is only the position of the baton which is decisive. Passing of the baton outside the exchange zone shall result in disqualification.

Relay Disqualifications

6.6.2
6.6.2.1 Competitors, before receiving and/or after handing off the baton should keep in their general area or position relative to the inside edge track until the course is clear to avoid obstruction to other competitors. If a competitor impedes a member of another team by running out of position or lane, his or her team shall be disqualified.

6.6.2.2 Assistance between team members by pushing or by any other method shall result in disqualification of that team.

APPENDIX A

WATERFALL START LINES

Guidelines for those Using Oval

Waterfall (curved) starting lines are used for all races in Special Olympics Snowshoeing not run entirely on a straightaway (200 meters and up and the relays). The waterfall starting line will ensure that each competitor runs the same equal distance going into the curve, from any starting position along this waterfall start line (i.e. snowshoer starting along the outer edge of the track covers the same distance as snowshoer starting along the inside edge of the track).

In the diagram below the curved line A to B is the waterfall starting line. An athlete starting at point B would cover the same distance on the track as a person starting at point A, when measured to the upper pin location, point D, ~25 meters into the curve.

The curved waterfall starting line may be established by driving a row of pins 3.05 meters (10 ft) apart, 0.3 meters (12 in) from the curb-- the first pin to be 0.3 meters (12 in) from the curb at the start. For a 9.75 meter (32 ft) track, 10 pins are sufficient.

Using a steel tape or rope 30.48 meters (100 ft) or longer, and with the pin furthest from the start as center, scribe an arc (the waterfall start line) from pole to outer curb of track.

The distance for spacing of the pins—3.05 meters—is an arbitrary and sufficiently accurate interval.

This will not be an arc of a circle as the radius will change as the tape loses contact with each successive pin.
