Cool-Down Directions

When your training, practice or sport session is complete, you should always cool-down. A good cool-down allows your body to gradually return to a state of rest.

A typical cool-down includes:

1. Light aerobic activity
2. Static stretching

The aerobic activity in a cool-down should decrease in intensity. It could be a light jog, moving into a brisk walk and finally ending to a slow walk.

After you complete the light aerobic activity, you will want to stretch. Stretching for flexibility is very effective in the cool-down.

HOW TO USE THIS GUIDE

- Hold each stretch for **at least 30 seconds**.
- **Stretch both sides** – if you stretch your right shoulder muscle, stretch the left!
- Stretches should be performed to **mild discomfort**, but should not be painful.

Sample Cool-Down

LIGHT AEROBIC ACTIVITY

The light aerobic activity in a cool-down should decrease in intensity. It could be a light jog, moving into a brisk walk and finally ending to a slow walk.

STATIC STRETCHES

Unlike dynamic stretches, static stretches consist of one position that is held in place. If you don't have enough time, select a few that focus on the different muscles used in your sport:

- Butterfly Stretch
- Cross Arm Shoulder Stretch
- Figure Four Hip Stretch
- Hamstring Stretch
- Knee to Chest
- Kneeling Hip Stretch
- Rounded Back Stretch
- Wrist Flexion and Extension

Butterfly Stretch

DIRECTIONS

- Sit on the ground with the bottoms of your feet touching each other.
- Let your knees fall toward the floor. Your feet should be close to your body.
- Sit tall and lean forward over your feet.
- You should feel a stretch in your groin.

Cross Arm Shoulder Stretch

DIRECTIONS

- Cross your left arm across your chest with your elbow slightly bent. Make sure to keep your left shoulder down away from your ear.
- Place your right hand on the back of your left arm just above the elbow. Pull your left arm in toward your chest until you feel a stretch. Repeat with your right arm.

Figure Four Stretch

DIRECTIONS

- Lay on the ground with your right knee in the air.
- Put your left ankle on top of your right thigh.
- Grab underneath your right thigh. Pull your thigh towards your chest. You should feel a stretch in your left hip.
- Switch legs and repeat the stretch.

Kneeling Hip Stretch

DIRECTIONS

- Kneel on the ground.
- Take one big step forward. Bend your front leg.
- Push your hips forward and put your hands on your hips. You should feel a stretch in your back leg's hip area.
- Repeat the stretch with the other leg in front.

Rounded Back Stretch

DIRECTIONS

- Stand tall and lace your fingers together with your palms facing outward.
- Stretch your arms out in front of you at shoulder level.
- Reach out so that you feel your upper back stretch. Tuck your chin toward your chest and look down.

Hamstring Stretch

DIRECTIONS

- Stand tall with your left foot a few inches in front of your right foot. Lift your left toes.
- Bend your right knee slightly and lean your body forward.
- Reach for your left toes with your left hand. Keep your right hand on top of your right thigh for balance and support.
- You should feel a stretch in the back of your left leg.
- Repeat the stretch with your right leg forward.

NOTE: You can also do this stretch kneeling on the ground.

Knee to Chest

DIRECTIONS

- Lie on your back with your legs straight.
- Bring your right knee toward your chest.
- Wrap your hands underneath your knee. Pull your leg closer to your body until you feel a stretch in the back of your right thigh.
- Repeat the stretch on your left leg.

Wrist Flexion & Extension

FLEXION

DIRECTIONS

- Sit or stand with your head up and looking forward.
- **Extension:** Turn your palm towards the ground. Use the other hand to pull your hand down toward the ground.
- **Flexion:** Turn your palm face up toward the ceiling. Use the other hand to pull your fingers back toward the ground.
- Switch arms and repeat both stretches.

EXTENSION

Benefits of a Cool-Down

It is just as important to have a good cool-down as it is to have a good warm-up. A good cool-down **allows the body to gradually return to a state of rest.**

Physical and Mental Benefits

- Decrease heart rate
- Decrease breathing rate
- Decrease body and muscle temperature
- Returns rate of blood flow from the active muscles to resting level
- Decrease muscle soreness
- Improve flexibility
- Increases the rate of recovery from exercise
- Promote relaxation
