

# Project Vision

SO Connect is the technology platform that connects, engages and mobilizes, every day, globally around the world.

An online, centralized, searchable database home to information on over 100,000 competitions and millions of athletes worldwide.

Ability to track, monitor and facilitate relationships, interactions and communications.

Third-party system integration capabilities for in-competition scoring/timing systems and results publication to websites or mobile apps.

Connecting the movement through technology: Delivering a web-based games management solution supporting the constituent lifecycle from registration to competition.

A vital tool to empower all Special Olympics competitions to be great regardless of size or location.

Contributes to the improvement of games management at Special Olympics events and improves the sports experience for all stakeholders

At the heart of an organization-wide effort to connect everyone through technology and radically improve the Special Olympics experience for all.
